(o) RESULTS: (For all hits claimed on ship targets and for land targets of special interest, draw diagram, top or side view or both, as appropriate, showing type and location of hits. For all targets give location and effect of hits, and identify by numbers above. Use additional sheets if necessary).

Might have blown in the sides of some of the buildings, but all the large ones were still standing after the attack. Saw debris fly from INGLEHART's direct hit on small building.

Strafing set afire the building with "Hospital" written on top of it.

(p) Were Photographs Taken? No. Photographs of Damage, When Taken, Should Be Attached By Staple.

In afternoon attack, the flight made two bombing runs and one strafing run. Results in both instances were disappointing. Pilots all agree that the correct procedure against a building is to use four to five seconds delay fuses and come in at very low level.
